**Valued Walmart Supplier**

**Re: Completion – Facility Security Audit**

Walmart Stores maintains a risk-based supply chain security program to ensure that sourcing and shipping facilities maintain security necessary to protect against product and shipment tampering. A supplier / service provider is responsible for ensuring that their facility accomplishes the Walmart security standards for merchandise produced and shipped directly to Walmart when Walmart, or a Walmart entity, is the Importer of Record (IOR) – regardless of the destination country, or Private Brands regardless of IOR. A facility is required to participate in a third-party security audit to confirm that security standards are met.

**CONGRATULATIONS!** The facility below passed a security audit performed by our designated third party audit company.

<b>Facility Name</b>	Suzhou Fuyougang Can Products Co., Ltd
<b>Factory ID (Walmart )</b>	36208191
<b>Facility Address</b>	No28-9&#65292;Shuangma Road, Dianshanhu Town, ,,,
<b>Facility City</b>	KUNSHAN
<b>Facility Country</b>	China
<b>Assessment #</b>	A4717889
<b>Audit Score</b>	82
<b>Merchandise Type</b>	

Please inform the facility of this audit result. Successfully passing the supply chain security audit ensures continued recognition by Walmart that the supplier and production facility are trusted merchandise providers.

The audit report is provided with this letter. In an effort to ensure continuous security improvement, a Corrective Action Plan (CAP) may be attached. If attached, Walmart requires the facility to complete the CAP listing the Critical Security findings. Please work with the facility to complete and return the CAP within 60 days of the audit date to the address below based on the country where the facility is located. The completed CAP must specifically describe the corrections made and include proof of correction, such as a photograph or document.
